

## CERTIFICATION OF ALTIMETER SYSTEM AND ALTITUDE REPORTING EQUIPMENT TESTS AND INSPECTIONS (GACAR 91.451)

<b>GACAR 91.451 (a) (1)</b>	Each static pressure system, each altimeter and each automatic pressure altitude reporting system has to be tested and inspected at intervals not exceeding 24 months in accordance with Appendices D and E to GACAR Part 43.
<b>GACAR 91.451 (a) (2)</b>	Except for the use of system drain and alternate static pressure valves following any opening and closing of the static pressure system, the system must be tested and inspected and found to comply with paragraph (a) of Appendix D to GACAR Part 43.
<b>GACAR 91.451 (a) (3)</b>	Following installation or maintenance on the automatic pressure altitude reporting system of the ATC transponder where data correspondence error could be introduced, the integrated system is to be tested, inspected and found to comply with paragraph (c) of Appendix D to GACAR Part 43.

**The certification has to be made with the following stamp or preprinted tag.**

I hereby certify that the altimeter and static system test required by GACAR 91.451 has been performed and found satisfactory.
