

<<< **GACA ADVISORY CIRCULARS** >>>

NOTE:

The GACA Advisory Circulars in this folder have been prepared to assist aviation personnel in complying with the General Authority of Civil Aviation Regulations (GACAR).

There are two principle reasons why a GACA Advisory Circular may be published:

1. To provide additional regulatory information to aid in the understanding and application of the GACAR; and/or
2. To provide acceptable means of compliance with specific regulatory provisions contained in the GACAR.

The specific purpose(s) for which a particular GACA Advisory Circular has been published is always noted at the beginning of the first page of the document.

GACA Advisory Circulars never introduce new or additional regulatory requirements. They simply offer information and guidance related to the regulatory requirements contained in the GACAR.
